

## Stockbridge Practice News – January 2025

Just a reminder about our website:

[stockbridgesurgery.co.uk](https://stockbridgesurgery.co.uk)

The '[Do I need to see a GP](#)' page is worth checking before ringing to make an appointment. Some services accept self-referrals.

### Lost property

We have several hats/caps, a book and some jewellery which have been found at the surgery. If you think any of these may be yours, please contact us with a description of the item and we will see if it matches anything we have in the lost property box.

### Does your child use a blue reliever inhaler?

*Children who need to use a blue reliever inhaler more than 2-3 times per week are more likely to have severe asthma/wheeze attacks.*

We are taking part in the Prescription Alerts for Reliever inhalers in Children (PARC) Project led by University Hospital Southampton NHS Foundation Trust. The aim of this project is to find out whether an enhanced nurse-led check-up will reduce the number of asthma/wheeze attacks experienced by children and young people using too many blue inhalers.

**If your child is eligible to take part in the PARC Project, you may be contacted by the practice between May 2024 and October 2026.**

### Long term condition reviews

We invite patients who have asthma, COPD or diabetes to the surgery for a yearly check up with one of our Practice Nurses or Healthcare Assistant. You will be invited around the month of your birthday.
